

Aesthetic Laser Services *Menu*

From hair reduction to tightsculpting, the GMHC Surgery Department offers a variety of Aesthetic Laser Services without the downtime of traditional surgery.

Hair Reduction

Laser hair treatments are a safe, effective and convenient way to achieve permanent hair reduction. Options include facial hair, including upper lip or chin, bikini line, Brazilian, legs, arms, and man's chest or back.

- *Requires approximately 6-10 sessions with 4-6 weeks between sessions to achieve desired results*
- *Session number depends on hair color and coarseness of hair*

Spider Veins

Reduced visualization and appearance of spider veins.

- *Usually requires one or two treatments*

Liplase

Noninvasive plumping for fuller lips without injectables.

- *Typically requires 3-6 treatments with three weeks between sessions*

Smootheye

Reduce the appearance of fine lines and wrinkles without pain or downtime. Provides natural tightening and toning with long lasting results that are easy to maintain without fillers or toxins.

- *Usually requires a minimum of 4 sessions with 4-6 weeks between sessions*

4D Facial Rejuvenation

This innovative laser treatment offers a non-surgical, non-invasive 4-step process that delivers a natural looking and long-lasting result. This includes tightening and wrinkle reduction without injectables.

- *Requires approximately 3-5 treatments with 4-6 weeks between treatments*
- *Maintenance treatments include one treatment every 9-12 months*

Tightsculpting

Tightsculpting is a unique non-invasive laser treatment that combines two procedures in one for sculpting and skin tightening on all body areas. This treatment provides exceptional results without surgery or downtime.

- *A minimum of 3 treatments are recommended with 4-6 weeks between treatments to achieve desired results*

Scar and Stretchmark Reduction

Effective treatment for a wide range of scar tissues by gentle ablation of scar tissue and activation of collagen remodeling with visual results.

- *Typically Requires 4 to 6 sessions with 4-6 weeks between sessions*

Acne Scar Reduction

This treatment includes gentle skin resurfacing to improve the appearance of acne scars.

- *Usually requires 4-6 sessions with 4-6 weeks between sessions*

Active Acne Laser Treatment

A laser acne treatment protocol that provides a truly comprehensive solution for the problem of acne. The laser light safely targets overactive sebaceous glands and reduces the risk of developing new acne inflammation.

- *Typically requires 6 treatments with 4-6 weeks between sessions*
